

X-U 16

Faster and more secure on-steel fastening

Hardened and galvanized steel nail for use with powder-actuated nailers.

ADVANTAGES

One nail, many applications

Rigid and unique design easily penetrates hard base materials across a wide range of steel applications.

Built for speed

Combines with our advanced and user-friendly powder-actuated fastening system to get the job done faster.

Secure fastenings

Engineered for best-in-class load performance for sheet metal attachments to structural steel.

Peace of mind

Multiple certificates and approvals are available.

SINGLE NAILS

For fastening deflection clips and drywall track to steel.

COLLATED NAILS

For serial fastening of track / clips to steel and temporary decking.

NAILS WITH STEEL WASHER

For fastening siding and ceiling clips.
